WATER RESOURCES
STATE OF COLORADO
DENVER

IN THE MATTER OF THE APPLICATION FOR)
WATER RIGHTS OF DALLAS MEADOWS, INC.,)
a Colorado Corporation, IN THE)
UNCOMPAHGRE RIVER OR ITS TRIBUTARIES;) RULING OF WATER REFEREE
IN THE DALLAS CREEK, IN OURAY COUNTY.)

The applicant, Dallas Meadows, Inc., a Colorado Corporation, P.O. Box 346, Ouray, Colorado 81427, requests a change of water right on the Wood-Perry Ditch, Priority No. 66. Filed January 30, 1979

Opposition filed by Colorado River Water Conservation District, c/o Scott Balcomb, P. O. Drawer 790, Glenwood Springs, Colorado 81601. Filed: March 26, 1979. WITHDRAWN: July 24, 1979.

FINDING OF FACT

The Wood-Perry Ditch is entitled,in old Water District No. 68, to 4.125 c.f.s. of water for irrigation purposes, 3.49 c.f.s. of which is claimed by the applicant.

Said ditch has as a source of supply, Dallas Creek, a tributary to the Uncompahgre River, in Ouray County and old Water District No. 68.

The diversion is described as being located on the South bank of said Dallas Creek at a point whence the SE corner of Section 5, Township 45 North, Range 8 West, N.M.P.M. bears South 35° East 1100 feet distant.

The applicant has constructed a well known as the Dallas Meadows Domestic Well with a sustained yeild of 21 G.P.M., the well being located approximately 140 feet from the South Section line and approximately 1620 feet from the East Section line of Section 4, Township 45 North, Range 8 West, N.M.P.M. Said well is to be used in a subdivision for domestic purposes and it is the intent of this application to protect said well in the event of priority call by transferring 21 G.P.M. from the above described Wood-Perry Ditch to the well head.

In order to do this, it is understood by the applicant that because of increased consumptive use, it is necessary to transfer double the amount desired for the protection of other priorites and to eliminate adverse affect to the stream. Therefore, 42 G.P.M. will be left in the Dallas Creek stream for the use of 21G.P.M. from the well.

R U L I N G

IT IS THE RULING OF THE REFEREE that adverse affect has been provided for and that the Wood-Perry Ditch is APPROVED AND GRANTED a change in point of diversion and use to the Dallas Meadows Domestic Well in the amount of 42 G.P.M., which shall remain in Dallas Creek and allow the production of 21 G.P.M. from the Dallas Meadows Domestic Well,with a priority date of May 10, 1982

DATED 7-31-79

E. L. WILSON

Water Referee
Division No. 4

No protest was filed in this matter. The foregoing ruling is confirmed and approved, and is made the judgment and decree of this court.

Dear Sir:

The subject application for a permit to construct a well has been denied and enclosed is the Order of the State Engineer as well as a copy of the denied application.

This denial becomes final and conclusive within thirty (30) days of your receipt of this notice. If you would like to present additional hydrologic and geologic data to support the application, please advise this office, in writing, within that time. The data should show that unappropriated water is available for withdrawal by the proposed well and that other water rights will not be injured.

In making inquiries regarding this denial, please contact Ron P. Schiff of this office and refer to the file number shown above.

Very truly yours,

Bruce E. DeBrine

STATE OF COLORADO

FILE NO: AD - 8009

IN THE MATTER OF AN APPLICATION OF DALLAS MEADOWS, INC. FOR A PERMIT TO CONSTRUCT A WELL IN A TRIBUTARY AQUIFER IN WATER DIVISION NO. 4, OURAY COUNTY, COLORADO.	)	REPORT, FINDINGS, AND ORDER OF THE STATE ENGINEER

REPORT

On November 8, 1978, Dallas Meadows, Inc, Box 340, Ouray, CO 81427, filed an application for a permit to construct a well in the Southwest 1/4 of the Southeast 1/4 of Section 4, Township 45 North, Range 8 West, of the New Mexico Principal Meridian, for the purpose of diverting ground water at a rate of 11 gallons per minute from a tributary aquifer for municipal purposes with an estimated average annual appropriation of one acre-foot.

FINDINGS

Having reviewed hydrological and geological data for the general area involved, the State Engineer finds that:

1. The proposed well, located in the Southwest 1/4 of the Southeast 1/4 of Section 4, Township 45 North, Range 8 West of the New Mexico, Principal Meridian, will be outside the boundaries of a designated ground water basin and the State Engineer, therefore, has jurisdiction.

2. He is unable to determine that the water produced from the proposed well will not influence the rate or direction of movement of the water in the Uncompahgre River.

3. He is unable to determine that unappropriated water is available for withdrawal by the proposed well;

4. He is unable to determine that the vested water rights of those senior appropriators diverting water tributary to the Uncompahgre River would not be materially injured.

ORDER

NOW THEREFORE IT IS ORDERED that the application of Dallas Meadows, Inc. to construct a well in the Southwest 1/4 of the Southeast 1/4 of Section 4, Township 45 North, Range 8 West of the New Mexico Principal Meridian, is hereby denied.

Ordered this 25th day of January 1979.

Re: File No. AD8009; our file 79-10

Attention: Ralph Stallman

Dear Mr. Stallman:

I enclose, for your convenience, a copy of the denied application in the referenced file number. I also enclose a copy of the ruling of Water Referee for Water Division No. 4, which transferred sufficient water to satisfy the well's sustained production of 21 gallons per minute from the Wood-Perry Ditch to the Dallas Meadows domestic well. I request that the previously denied permit now be approved.

If you have any questions, please don't hesitate to contact me.

Very truly yours,

Richard P. Tisdel

Ouray, CO 81427

RE: Well Permit No. 25074-F located in the SW 1/4 of the SE 1/4, Section 4, Township 45 North, Range 8 West, New Mexico Principal Meridian

Gentlemen:

The subject permit to construct a well was issued by this office on June 21, 1982. A review of our records indicates that a Statement of Beneficial Use has not been submitted showing that water from the well was put to beneficial use prior to June 21, 1983, and no extension to the expiration date was requested.

Pursuant to CRS 1973, 37-90-137(3)(a), you are hereby notified that the Permit No. 25074-F expired on June 21, 1983.

Pursuant to CRS 1973, 37-90-137(3)(c), you are hereby given the opportunity to submit proof that the water was put to beneficial use prior to June 21, 1983, but due to excusable neglect, inadvertence, or mistake, you failed to submit the evidence on time. The proof must be received by the State Engineer within twenty (20) days of receipt of the notice by the applicant and must be accompanied by a $30 filing fee. If the proof can be given favorable consideration by the State Engineer, then within thirty (30) days, a synopsis of the proof shall be published specifying that objections shall be filed in thirty (30) days. After the expiration of the time for filing objections, if no such objections have been filed, the State Engineer shall if he finds the proof to be satisfactory, find that the permit should remain in force and effect. If objections have been filed, the State Engineer shall set a date for a hearing on the proof and the objections thereto and shall notify the applicant and the objectors of the time and place. The State Engineer shall consider all evidence presented at the hearing in determining whether the permit should remain in force and effect.

PS Form 3800, Apr. 1976

To Dallas Meadows

A Statement of Beneficial Use form is enclosed for your convenience. Submission of the completed form and fee alone is not sufficient to comply with the provisions of the statute. You must also submit proof that the evidence of use was not timely submitted because of excusable neglect, inadvertence, or mistake. The proof should state facts detailing why the evidence of beneficial use was not submitted on time.

A review of our files shows that neither a well completion report nor a pump installation report has been received for the well. This information should have been submitted by the well driller. These reports will be needed prior to this office's acceptance of a Statement of Beneficial Use. Please contact the driller and pump installer to ask them to complete the necessary forms or obtain copies from them to be submitted along with the Statement of Beneficial Use.

A review of our files shows that a condition on the replacement permit was that the old well to be replaced must be plugged and abandoned according to Rules and Regulations for Water Well and Pump Installation Contractors, and an abandonment affidavit sent to this office. We have no record that the well was plugged and abandoned. The well must be plugged and an abandonment affidavit properly completed and submitted to this office prior to our acceptance of a Statement of Beneficial Use.

If you have any questions regarding this matter, please contact Mr. Mel Malley of this office.

Sincerely,

Robert A. Longenbaugh

DRILLER JEROME WALER LICENSE NO. 1045

DIVISION

BY Jerome M. Waler

IN THE DISTRICT COURT
WATER DISTRICT #4

FILED
DEC 3 1979
Kay Ortega
WATER CLERK
DEPUTY

IN THE DISTRICT COURT IN AND FOR
WATER DIVISION NO. 4
STATE OF COLORADO
Case No. 79CW19

IN THE MATTER OF THE APPLICATION FOR)
WATER RIGHTS OF DALLAS MEADOWS, INC.,)
a Colorado Corporation, IN THE)
UNCOMPAHGRE RIVER OR ITS TRIBUTARIES;) RULING OF WATER REFEREE
IN THE DALLAS CREEK, IN OURAY COUNTY.)

The applicant, Dallas Meadows, Inc., a Colorado Corporation, P.O. Box 346, Ouray, Colorado 81427, requests a change of water right on the Wood-Perry Ditch, Priority No. 66. Filed:January 30, 1979

Opposition filed by Colorado River Water Conservation District, c/o Scott Balcomb, P. O. Drawer 790, Glenwood Springs, Colorado 81601. Filed: March 26, 1979. WITHDRAWN: July 24, 1979.

FINDING OF FACT

The Wood-Perry Ditch is entitled,in old Water District No. 68, to 4.125 c.f.s. of water for irrigation purposes, 3.49 c.f.s. of which is claimed by the applicant.

Said ditch has as a source of supply, Dallas Creek, a tributary to the Uncompahgre River, in Ouray County and old Water District No. 68.

The diversion is described as being located on the South bank of said Dallas Creek at a point whence the SE corner of Section 5, Township 45 North, Range 8 West, N.M.P.M. bears South 35° East 1100 feet distant.

The applicant has constructed a well known as the Dallas Meadows Domestic Well with a sustained yeild of 21 G.P.M., the well being located approximately 140 feet from the South Section line and approximately 1620 feet from the East Section line of Section 4, Township 45 North, Range 8 West, N.M.P.M. Said well is to be used in a subdivision for domestic purposes and it is the intent of this application to protect said well in the event of priority call by transferring 21 G.P.M. from the above described Wood-Perry Ditch to the well head.

In order to do this, it is understood by the applicant that because of increased consumptive use, it is necessary to transfer double the amount desired for the protection of other priorites and to eliminate adverse affect to the stream. Therefore, 42 G.P.M. will be left in the Dallas Creek stream for the use of 21G.P.M. from the well.

R U L I N G

IT IS THE RULING OF THE REFEREE that adverse affect has been provided for and that the Wood-Perry Ditch is APPROVED FOR CHANGE a change in point of diversion and use to the Dallas Meadows Domestic Well in the amount of 42 G.P.M., which shall remain in Dallas Creek and allow the production of 21 G.P.M. from the Dallas Meadows Domestic Well,with a priority date of May 19, 1882

Re: Water Permit No. 25074-F
Our File No. 79-10

Gentlemen:

I enclose copies of letters which I forwarded to you on December 6, 1983, and December 8, 1983, concerning the referenced well permit. I need some decision from you concerning this matter. As I informed you in my December 6 letter, we have filed an Amended Petition with the Water Court for the decree for this well. Publication has been completed for the requisite period of time and we are awaiting a decree. I respectfully request that your advice or action on the well permit be expedited.

Thank you for your attention.

Very truly yours,

Richard P. Tisdel

RE: Well Permit #25074-F
Our File #70-10

Dear Mr. Longenbaugh:

Glen Bertrand, the President of Dallas Meadows, Inc., has forwarded your letter of November 15, 1983, to me for reply. I have not been able to completely decipher what has happened with this well but, basically, I believe it is as follows:

The original well, located in the SW1/4SE1/4 of Section 4, Township 45 North, Range 3 West, N.M.P.M., which was approved for the Dallas Meadows Planned Unit Development, became unusable. Mr. Bertrand hired Wayne's Drilling Service of Olathe to drill a replacement well. It was for this replacement well (also to be in the SW1/4SE1/4 of Section 4) that the permit #25074-F was issued. Wayne's Drilling was unsuccessful. Bertrand had, meanwhile, become ill, and had to leave the state. At that point, the Dallas Meadows Community Association took over the task of attempting to obtain a replacement well. That group contacted Valley Drilling, which was operating under the license of Valley Pump Service (License #1045). Valley Drilling, in turn, drilled a new well which is, as you can see, located almost three-quarters of a mile northwest of the original well and of the originally proposed replacement well. As nearly as I can tell, neither Valley Drilling nor the Dallas Meadows Community Association applied for a new permit. Apparently, they felt they were drilling under the authority of the original permit issued at the request of Wayne's Drilling Service.

I really don't understand why the drillers' report, pump installation report and Statement of Beneficial Use were not submitted but it appears that they were not. I think that there were simply too many people involved and they all assumed somebody else was taking care of the necessary reports. Meanwhile, I was asked by Mr. Bertrand to apply for a change of the water right appurtenant to the original well. I was given a copy of Permit #25074-F and assumed that the replacement well was in the location identified on that permit. I made application for the change of water right on the basis of that location but, because of the variance of location, the application has not been granted. I now anticipate that I will need to amend the application. I am not really entirely sure what to do about the well permit. It appears that the subdivision is using a replacement well for its domestic user, which is located approximately three-quarters of a mile away the well permitted by Permit #25074-F. I would appreciate your advice on the proper course of action. Should a new application for a replacement well permit be sought or can the original application be amended? I have already undertaken, as I said, to amend the application for change of water right.

I enclose the affidavit concerning failure to submit the Statement of Beneficial Use and the Statement of Beneficial Use itself. I have been in contact with Valley Drilling and have been assured that the well drillers' report will be prepared and sent to me to be sent on to you. I do not know, at this time, whether the original well has been formally abandoned and plugged. I do know that it is not in use and that the pump has been removed. When I have the information concerning the well abandonment, I will also forward this.

Please do not hesitate to call me, collect, if I need to submit any further information at this time. Thank you for your assistance.

DEC - 8 1983
WATER RESOURCES
STATE ENGINEER

A F F I D A V I T

On June 21, 1982, the Colorado State Engineer issued permit No. 25074-F. The water from the well was to be used for subdivision (commercial/domestic) purposes.

I (~~we~~) failed to submit evidence of beneficial use showing the ground water from the well was put to beneficial use prior to the expiration date of the well permit due to the following: The owner, Dallas Meadows, Inc., applied for the original permit and hired Wayne's Drilling Service, Olathe, Colorado, to drill. The original replacement well, for which the permit was issued, was not successful. The Dallas Meadows Community Association then hired Valley Drilling Service, Montrose, to drill a replacement well. Valley drilled in a different location and was successful. Apparently both the owner and the Community Association thought (1) Valley was submitting the drilling report and pump installation report, and (2) that the other had submitted a statement of beneficial use. The undersigned has been asked to complete all necessary reports, which are enclosed, or in progress.

Further, the affiant(~~s~~) depose(s) and say(s) that he (~~she~~) (~~they~~) has (~~have~~) read the statements made herein; knows the contents hereof; and that the same are true of his (~~her~~) (~~their~~) own knowledge.
